

Apply — User Guide

Tenx Documentation

Apply — User Guide

Apply is the application and selection platform — the entry point to the Tenx ecosystem. It manages the full applicant journey from intake through assessment, review, and selection. This guide covers everything **applicants** and **staff** do on the platform.

Download the full user guide (PDF) { .md-button .md-button--primary
download="Apply-User-Guide.pdf" }

1. Getting Started

1.1 Overview of Apply

Apply is an applicant intake, assessment, and selection platform. It enables organisations to manage application cycles end-to-end — from collecting applicant information and running assessments, through staff review, to final selection decisions.

The platform supports any program, course, fellowship, or hiring process where structured applications, assessments, and reviewer workflows are required. It is delivered as a subscription product and configured per organisation.

1.2 User Roles

Apply supports three primary user roles, each with a different experience:

Applicant

- Create and manage their account
- Submit applications to open programs and cohorts
- Take required assessments within timed windows
- Track the status of their application

Reviewer

- Review assigned applications
- Score applicant responses against rubrics
- Leave evaluation notes for selection committees

Program Coordinator

- Configure cohorts, forms, assessments, and review rubrics
- Manage applicant pools and assign reviewers
- Communicate with applicants in bulk
- Make selection decisions and export data

1.3 System Requirements

To use Apply effectively:

- A modern web browser — Chrome, Firefox, Edge, or Safari
- A stable internet connection
- A desktop or laptop (especially for staff workflows)

1.4 Accessing the Platform

Access is provided once a program is published or a staff role has been provisioned.

- **Applicants** typically receive a public link from the program announcement
- **Staff** receive credentials and a workspace invitation by email

Access steps:

1. Open your web browser
2. Enter the platform link provided to you
3. Proceed to the login page

If you do not yet have access, contact your platform administrator or support@10academy.org.

2. Authentication

2.1 Login

The login page lets users access Apply using either email/password credentials or Google authentication.

Steps to Log In:

1. Open your web browser
2. Navigate to your Apply platform link
3. On the login page, enter your registered email address
4. Enter your password
5. Click the **Login** button
6. Alternatively, click **Continue with Google** to sign in with a Google account
7. On success, you'll be redirected to your dashboard or workspace

2.2 Password Management

If you've forgotten your password, follow the steps below.

The screenshot shows a web interface for password management. On the left is a large grid of light blue squares. In the center, there is a red square with the number '10' and the word 'academy' next to it. To the right, there is a form with the following elements:

- A language selector at the top right with a dropdown arrow and the text 'English'.
- A speech bubble pointing to the language selector: 'Change interface language'.
- A label 'Write your email address' above an email input field.
- A speech bubble pointing to the email input field: 'Enter a valid email address'.
- A red button with a lock icon and the text 'Done'.
- A speech bubble pointing to the 'Done' button: 'Submit email and proceed'.
- A link 'Log in' in red text, preceded by the text 'Already have an account?'.
- A speech bubble pointing to the 'Log in' link: 'Redirect existing users to login'.

Steps to Reset Password:

1. Navigate to the Login page
2. Click **Forgot password** (below the Login button)
3. Enter your registered email address
4. Click **Done / Send Reset Link**
5. Check your email inbox for the reset link
6. Click the link in the email
7. Enter and confirm a new password
8. Click **Submit / Save**

Tip — If the reset email doesn't arrive within a few minutes, check your spam or junk folder before requesting another reset link.

Apply — Applicant Guide

This guide covers everything an applicant does on Apply: account creation, workspace navigation, submitting an application, taking assessments, and tracking status.

New here? Read the overview, login, and password reset first.

4. Applicant View

The Applicant View provides candidates with a personalised experience to register, complete their application, take assessments, and track submission progress.

4.1 Account Creation

New applicants begin with an **email-first signup**. The system collects an email address, validates it, then proceeds to password and profile setup. Account creation is applicant-side only — staff accounts are provisioned by the program team.

The screenshot shows a registration page for '10 academy'. On the left is a large grid of light blue squares with the '10 academy' logo in the center. On the right is a registration form. The form has a header 'Welcome !' and a sub-header 'We are thrilled you are here!'. It contains five input fields: 'Enter your first name', 'Enter your last name', 'Enter your email address' (with an envelope icon), 'Enter your password' (with a strength indicator icon), and 'Confirm your password' (with a strength indicator icon). Below these is an orange 'Register' button. Underneath the button is an 'Or' separator and a 'Continue with Google' button with the Google logo. At the bottom, there is a link 'Already have an account? Log in'.

User flow:

1. Land on the registration page from the public application link
2. Enter your email address in the provided field
3. Click **Done** to submit
4. The system validates the email format and checks whether the email already exists
5. If the email is valid and unused, you will proceed to password and profile setup
6. If the email is already registered, you will be redirected to the login page

Tip — You can change the interface language at any time using the language selector in the top-right corner of the page.

4.2 Applicant Workspace

After logging in, applicants land on their **Workspace** — a personalised home that shows the programs they have applied to (or can apply to) and the actions required of them.

From the workspace you can:

- See available programs and cohorts
- Open an application form
- Resume a draft submission
- Continue to the dashboard for any program you've already entered

4.3 Dashboard

Once you've started or submitted an application, the **Dashboard** becomes your central view of what's outstanding and what's already done.

4.3.1 Empty Dashboard (no tasks yet)

When you first land on the dashboard before any tasks have been issued, the view is empty.

4.3.2 Dashboard with Tasks

Once tasks (applications, assessments, or surveys) have been assigned to you, they appear here with their status and deadlines.

4.3.3 Tasks View

Click into the tasks list for a focused view of everything that needs your attention.

The tasks view groups your work by:

- **Pending** — tasks you haven't started or completed
- **In Progress** — tasks you've started but not yet submitted
- **Completed** — tasks you've finished

4.4 Submitting an Application

Once registered, applicants are guided to the available application form for the cohort they applied to.

SECTION 1

Section 1 covers your history with 10 Academy, commitment to full-time training, and financial preferences, taking 2 minutes to complete.

* What is your English level? We are only able to offer training in English (for now) and require that all trainees have sufficient English ability to be professionally competent. We tie our standard to CELF.

Please tick the checkbox if you have learned your studies fully in English for the following levels:

☐ Elementary School

☐ Middle School

☐ High School

☐ University

* After completing this training, what are your aspirations? Please select one:

☐ Become an entrepreneur

☐ Continue studying

☐ Start working

* Do you have the mindset to stick with something for at least 90 days? Are you committed to taking cold showers every morning for 90 days? Can you also commit to 8 to 10 hours per day, 5 days a week, for 90 days if you're admitted into our program? No side jobs, no conflicting obligations?

☐ Yes

Submission flow:

1. Log in to the platform
2. Open the application form for the cohort
3. Complete all required questions. You can save and return later — partial submissions appear as drafts on the staff side
4. Upload any required documents (CV, transcripts, portfolio links)
5. Review your responses on the final page
6. Click **Submit** to send your application

Tip — If you need to step away, your responses will be saved as a draft. You can resume from where you left off the next time you log in, as long as the application window is still open.

4.5 Taking an Assessment

Some programs require applicants to complete one or more **assessments** after submitting their application — or as a **pre-assessment** that must be passed before review. Assessments may be timed and have a fixed availability window.

4.5.1 Assessment Instructions

Before the timer starts, you'll see an instruction screen explaining the assessment rules, time limit, and any allowed reference material.

Before you begin:

- Use a stable internet connection on a desktop or laptop
- Close unnecessary tabs and applications to avoid distractions
- Have any allowed reference material ready before starting
- Read the instructions carefully — once started, the timer cannot be paused

4.5.2 Assessment Flow

1. Log in to the platform within the assessment window
2. Open the assessment from your dashboard
3. Read the instructions and confirm you are ready to begin
4. Answer each question. The timer is visible at the top of the screen
5. Submit your responses before the timer ends
6. Wait for the confirmation screen — your score will be reflected on the staff side

Important — Do not refresh the page or close the browser tab during an active assessment. Doing so may end your attempt or result in lost answers.

4.6 Tracking Your Application Status

Applicants can track the status of their application from their dashboard at any time. The status reflects where the application is in the review pipeline.

Application Status Definitions

Status	Meaning
Draft	You have started but not yet submitted your application
Submitted	Your application has been submitted and is awaiting processing
Assessment Pending	You need to complete an assessment before review can begin
Assessment Complete	Your assessment has been submitted and scored
Under Review	Your application is currently being evaluated by reviewers
Reviewed	All reviews are complete; your application is awaiting a final decision
Accepted	Congratulations — you have been selected for the program
Waitlisted	You are on the waitlist; you may be offered a place if one becomes available
Rejected	Your application was not selected for this cohort

Note — Final decisions are typically communicated by email in addition to being reflected in the platform. If you have any concerns, contact the program team using the support contact provided with your subscription.

Apply — Staff Guide

This guide covers every staff-side workflow on Apply: workspace selection, the cohort dashboard, assets (forms + question bank), and management (applicants, applications, reviews, assessments, surveys).

New here? Read the overview, login, and password reset first.

3. Staff View

The Staff View provides Program Coordinators and Reviewers with the tools needed to configure cohorts, monitor activity, manage applicants, and make selection decisions.

After selecting a workspace and cohort, the staff sidebar exposes three top-level menus:

Menu	What it covers	Section
Dashboard	Real-time monitoring through Applications, Assessment, and Surveys cards	§ 3.2
Assets	Forms and Question Bank — the reusable building blocks of a cohort	§ 3.3
Management	Operational hub: Applicant List, Applications, Reviews, Assessment, Surveys	§ 3.4

3.1 Workspace Selection

After logging in, staff users land on the Workspaces page. A **workspace** represents a program (e.g., AI Engineering, Project Management), and each workspace contains one or more **cohorts** (groups of applicants for a specific intake).

Primary flow:

1. Log in as a staff user
2. Land on the Workspaces page
3. Review the list of available workspaces (programs) and the cohorts within each
4. Click the arrow (→) on a cohort card to drill in
5. The system navigates you to the Dashboard for the selected cohort

3.2 Dashboard

The Dashboard is the first screen staff see after entering a cohort. It is a real-time monitoring interface that surfaces engagement and activity through three cards: **Applications**, **Assessment**, and **Surveys**.

Dashboards Cards

Card	Purpose
Applications	Aggregates responses across all application forms in the cohort
Assessment	Shows total responses for each assessment, with arrows to switch between assessments
Surveys	Aggregates survey responses for the cohort

3.2.1 Applications Card

Clicking into the Applications card opens the **Application Detail** page. It combines submission analytics with detailed applicant responses.

What you can do here:

- Monitor submission activity in real time
- Analyse trends across the submission window
- Review individual applicant responses
- Send bulk emails to selected applicants
- Customise the columns shown in the applicant table
- Export applicant data to CSV
- Review incomplete drafts

Statistics Section

The Statistics section at the top summarises submission activity:

- **Total Response** — running total of completed submissions
- **Today** — number of submissions received today
- **Trend Indicator** — comparison vs. yesterday (e.g. *0.00% vs yesterday*)
- **Time-Series Chart** — submissions over the active window

Applications Table

Below the statistics, the table lists each completed submission. Tabs at the top let you switch between **Applications** (completed) and **Application Draft** (incomplete).

Bulk Email Communication

Send emails directly to selected applicants from the application table:

- Select one or multiple applicants using checkboxes
- Compose and send emails directly within the platform
- Manage recipients using To, CC, and BCC fields

Field	Behaviour
To	Primary recipients. Allows manual addition via <i>Add Recipient</i>
CC	Secondary visible recipients. Optional
BCC	Auto-populated with the selected applicants. Recipients are hidden from each other (recommended for mass mailing)

Steps to send a bulk email:

1. Select one or more applicants using the checkboxes in the applications table
2. Click the email icon in the toolbar to open the **New Email** panel
3. Confirm the BCC list (auto-populated with the selected applicants)
4. Add any additional To or CC recipients as needed
5. Enter a **Subject** line
6. Compose the email body using the rich text editor
7. Click **Send**

Important — When sending mass communication to applicants, always use the BCC field so recipient email addresses remain private. The platform pre-populates BCC by default for this reason.

Edit Columns — Application Table Customisation

Customise which data fields appear in the applications table to focus on the data relevant for each review workflow.

1. Open the Application Detail page
2. Click the **Edit Columns** icon above the applications table
3. Use the search bar or scroll the list
4. Toggle each column on or off using the checkboxes
5. Click **Save** (or close the dialog) to apply your selection

Export Data — CSV Export

Select specific fields before exporting applicant data into a CSV file.

1. Open the Application Detail page
2. (Optional) Filter or select specific applicants in the table
3. Click the **Export** icon above the applications table
4. In the *Select columns to export* dialog, choose the fields to include
5. Click **Export** to download the CSV file

Tip — Sensitive fields such as personal identifiers can be excluded by simply unchecking them in the column-selection dialog.

Application Drafts

The **Application Draft** tab displays incomplete or partially submitted applications. Use it to:

- Identify applicants who may need a reminder before the deadline
- Monitor drop-off points in long application forms
- Reach out to applicants experiencing technical issues

Completed Applicants View

The completed applicants view shows the full set of submissions ready for review.

3.2.2 Assessment Card

Clicking into the Assessment card opens the Assessment view — a centralised interface to monitor participation, track scores, and manage assessment-related actions (email, export, edit).

Highlights:

- **Expected Number of Responses** — total invitees expected to attempt
- **Total Response** — completed assessment attempts
- **Today** — attempts submitted today, with trend indicator

- **Time-Series Chart** — submissions across the assessment window
- **Applicants Table** — per-applicant Name, Email, and Result (score)

Common actions:

- Email selected applicants directly from the assessment view
- Export results to CSV with custom column selection
- Edit assessment metadata (where role permits)
- Drill into individual applicants to review responses

3.2.3 Surveys Card

Clicking into the Surveys card opens the Surveys view, which aggregates feedback responses for the cohort.

Highlights:

- **Total Response** — running total of survey submissions
- **Time-Series Chart** — submissions across the active window
- **Respondents Table** — per-respondent details and answers
- **Action toolbar** — email, export, and edit options consistent with Applications and Assessment

3.3 Assets

Assets is the second top-level staff menu and acts as the centralised library for reusable content. It contains two areas: **Forms** and **Question Bank**.

Anything created in Assets can be reused across cohorts and programs.

3.3.1 Forms

The Forms area lists every form available within the selected workspace or cohort, along with title, type, and creation date.

Available actions:

- Create a new form using **+ New Form** (opens the Form Builder)
- Search forms by title using the search bar
- Open a form to view, edit, or duplicate it

- Switch between table view and card view (top-right toggle)

3.3.2 Form Builder

Clicking + **New Form** opens the Form Builder — a guided three-step flow.

Step	Purpose
General	Capture form metadata: title, optional description, form type
Input form creation	Add and configure questions and sections
Preview	Review the form exactly as applicants will see it before clicking Create

Form types supported:

Form Type	Use For
Application	Standard application forms used to collect applicant information
Survey	Feedback or pre-/post-program surveys
Evaluation	Structured evaluation forms
Review	Reviewer-facing forms for rubric-based scoring and notes
Interview	Forms used during interview rounds (used in Leap, configured here)
Analytics	Forms used to gather data for analytics and reporting

3.3.2.1 General Step

The screenshot displays the 'New Form' interface in the Form Builder. On the left, a sidebar shows the 'General' step selected, with sub-questions: 'What kind of input do you want to ask the user in order to generate Personalized Multiple choice questions?', 'Input form creation: What kind of input d...', and 'Preview: Do you want to ask L...'. At the bottom of the sidebar is a 'Next' button. The main area contains the 'Form Title' field, a 'Description(Optional)' field with a rich text editor (including bold, italic, link, and list icons), and a 'Form Type' dropdown menu with the placeholder text 'Please select form type'. A 'Cancel' button is located in the top right corner.

Captures core information about the form:

Field	Description
Form Title	The visible name of the form (required)
Description <i>(optional)</i>	Optional rich-text description
Form Type	The form category (required) — see table above

Steps:

1. On the Forms list, click **+ New Form**
2. Enter a **Form Title**
3. *(Optional)* Enter a **Description** using the rich text editor
4. Select a **Form Type** from the dropdown
5. Click **Next** to proceed

The screenshot shows the 'New Form' creation interface. On the left, a sidebar contains three sections: 'General' (What kind of input d...), 'Input form creation' (What kind of input do you want to ask the user in order to generate Personalized Multiple choice questions?), and 'Preview' (Do you want to ask L...). The main content area displays a form titled 'Section 1 of 1' with a 'General Information' section. Below this is a 'Form description' field. A text input field labeled 'Full name' is present, with a '+ Add Description' button below it. To the right of the input field is a dropdown menu labeled 'Select Field Type'. At the bottom left of the form is a 'Required' toggle switch. At the bottom right of the form is a 'Cancel' button. At the bottom left of the sidebar is a 'Next' button.

3.3.2.2 Input Form Creation Step

The Input form creation step is where staff add and configure the questions applicants will answer. The form is organised into one or more **sections**, and each section can contain multiple **fields** of different types.

Available actions:

- **Edit Section Title** — change the heading of the current section
- **Add Section Description** — provide context for the section
- **Select Field Type** — choose the field type from the dropdown for each new question
- **Add Description** — add helper text under a question to guide applicants
- **Required toggle** — mark a field as required
- **Duplicate field** — quickly clone an existing field
- **Reorder fields** — drag the handle to change the order
- **Add new field** — click the orange + button
- **Add another section** — open the section menu (three-dot icon) and select *Add Section*

Steps:

1. On the Input form creation step, set the section title and an optional description
2. For each question, click **Select Field Type** and choose the appropriate type (short text, long text, multiple choice, file upload, etc.)
3. Enter the question text
4. (Optional) Click **Add Description** to provide guidance
5. Toggle **Required** on or off
6. Click the orange + button to add another field
7. (Optional) Add additional sections to organise long forms
8. When done, click **Next** to proceed to Preview

Tip — Use sections to break long forms into logical groups (e.g., Personal Information, Education, Experience). This makes the form less intimidating for applicants and easier to review for staff.

3.3.2.3 Preview Step

The screenshot shows the 'Preview Step' of a form creation process. On the left, a sidebar lists three steps: 'General', 'Input form creation', and 'Preview'. The 'Preview' step is currently selected. The main area displays a form titled 'General Information'. It contains a 'Full name' field with the placeholder text 'Enter your full name'. A red circle with the number '1' is positioned on the left side of the form area. At the bottom left, there is a 'Create' button. At the top right, there is a 'Cancel' button.

The Preview step displays the form exactly as it will appear to applicants. Use this stage to verify section titles, field labels, helper text, required-field markers, and the overall flow.

Steps:

1. After completing Input form creation, click **Next** to enter Preview
2. Review every section and question, including required-field markers and helper text
3. Click the back arrow (←) to return to a previous step and make edits if needed
4. Once satisfied, click **Create** to publish

Important — Forms become available to applicants once they are created and the cohort is active. Always verify the form type, fields, and section titles in Preview before clicking Create.

3.3.3 Question Bank

The Question Bank stores reusable questions for assessments. Maintaining a centralised library standardises content across cohorts and gives reviewers a clear view of which questions are qualified for use.

What you can do in the Question Bank:

- Browse all questions by type, level, and tag
- Read each question and its answer in detail
- Change a question's status (Qualified, Unqualified, etc.)
- View overall statistics on the question library

3.3.3.1 Filter Questions

Opening the Question Bank starts with a filter screen.

The screenshot shows the 'Assessment' page with a 'Question Review' tab. It displays four filter sections: 'Question Types' (SQL, Python, Maths, Statistics), 'Question Levels' (Basic, Intermediate, Advanced), 'Question Tags' (Raw, Qualified, Unqualified, Mock), and '#Questions per Page' (5, 10, 25, 50). A 'Submit' button is located at the bottom right.

Filter	Options
Question Types	SQL, Python, Maths, Statistics
Question Levels	Basic, Intermediate, Advanced
Question Tags	Raw, Qualified, Unqualified, Mock
#Questions per Page	5, 10, 25, 50

Steps:

1. Navigate to **Assets** → **Question Bank**
2. Tick the **Question Types** you want to review
3. Tick the **Question Levels** you want included
4. Tick the **Question Tags** you want to see
5. Choose how many questions per page
6. Click **Submit**

3.3.3.2 Question Review

The screenshot displays the 'Question Review' screen for 'Cohort A'. On the left, a sidebar contains navigation links for 'Dashboard', 'Assets', and 'Management'. A vertical list of question numbers (1-12) is shown, with question 1 highlighted. The main area displays a question: 'Which data type would be most appropriate for a 'birthdate' column?'. Below the question, there are seven radio button options: 'INT', 'VARCHAR', 'DATE', 'FLOAT', 'All', 'None', and 'I don't know'. To the right of the question, a panel shows the question's metadata: 'Question Name: sql_basics_3', 'Question Type: sql', 'Question Complexity: 3', 'Question Level: basic', 'Question Tag: qualified', 'Answer: C', 'Topic: Data type', and 'Time: 2'. At the bottom right, there is a 'Next' button.

The Question Review screen displays the filtered questions one at a time. The right-hand panel shows full metadata:

Metadata	Meaning
Question Name	Internal identifier (e.g. sql_basics_3)
Question Type	SQL / Python / Maths / Statistics
Question Complexity	Numeric complexity score
Question Level	Basic / Intermediate / Advanced
Question Tag	Current status tag (e.g. <i>Qualified</i>)
Answer	The correct answer (e.g. "C")

Metadata	Meaning
Topic	Subject area covered
Time	Recommended time in minutes to answer

Available actions:

- Read the question and its choices in the main panel
- Change the status using the dropdown at the top of the question
- Edit the question using the pencil icon
- Delete the question using the trash icon
- Edit metadata using the pencil icon next to the metadata panel
- Navigate using the numbered list on the left or the **Next** button at the bottom

Tip — Reviewing questions and updating their status is the recommended first step before using a question set in a live assessment. Only Qualified questions should reach applicants.

3.4 Management

Management is the third top-level staff menu — the operational hub for running a cohort. Once Assets are configured, staff use Management to enrol applicants, run application forms, assign reviewers, run assessments, and collect surveys.

3.4.1 Management Page

The Management page contains a short cohort description at the top, followed by a grid of cards.

Card	Purpose	Drill-in
List of Applicants	Total applicants enrolled in the cohort	View Applicants

Card	Purpose	Drill-in
Applications	Total applications configured / submitted	View Applications
Reviews	Reviewer evaluations and rubric scoring	View Evaluation
Assessment	Total assessments configured	View Assessment
Surveys	Surveys configured for the cohort	View Surveys

***Note** — Cards display No data available until activity has occurred. For example, the Reviews card will be empty until reviewers have started evaluating applications.*

3.4.2 Applicant List

Clicking **View Applicants** on the *List of Applicants* card opens the cohort's applicant table — the canonical list of everyone enrolled, regardless of where they are in the application pipeline.

What you can do here:

- Search and filter applicants by name, email, or status
- Open an applicant's profile to see their full submission history
- Add applicants manually or import them via CSV
- Export the applicant list to CSV with custom column selection
- Send bulk emails to selected applicants

Typical workflow:

1. Open **Management** from the cohort sidebar
2. Click **View Applicants** on the *List of Applicants* card
3. Use the search bar or filters to find specific applicants
4. Click an applicant row to open their detailed profile
5. (Optional) Select multiple applicants to email or export

3.4.3 Applications

The screenshot displays the 'New Application' configuration interface. On the left, a sidebar lists the steps: 'Basic Info' (Title, Duration, etc.), 'Select Info' (Assign reviewers and select form), 'Users and Finishing Up' (Pick applicants...), and two other steps. The main content area is divided into sections: 'Reviewers' with a 'Select Reviewers' dropdown, 'Form' with a 'Select Form' dropdown, and 'Assign applicants based on prior responses' with a 'Select Prior Response Form' dropdown. Below these is a 'Send Email Confirmation' toggle switch. At the bottom left, there is a 'Next' button and a progress bar.

Clicking **View Applications** on the Applications card opens the list of application packages configured for the cohort. An *application package* bundles together the applicant-facing form with optional reviewer forms and pre-assessment requirements.

Available actions:

- View existing applications and their submission counts
- Open an application to see its full configuration and responses
- Create a new application using the **+ Create** button
- Edit or duplicate an existing application

3.4.3.1 Create New Application

A guided flow with five steps:

Step	Purpose
Basics	Name, description, dates, and link the applicant-facing form
Add Reviewer Form	Attach the Review-type form reviewers fill in for each submission
Add Pre-assessment	Attach an Assessment applicants must complete before review
Preview	Review the full package end-to-end
Create	Publish the application

Step 1 — Basics

The Basics step captures core metadata:

- **Application Name** — visible title shown to applicants and staff
- **Description** — optional context shown to applicants
- **Application Form** — pick a published form (Form Type: Application) from Assets
- **Open Date** — when applicants can begin submitting
- **Closing Date** — when the application window closes
- **Status** — Not Started / On Going / Completed

Step 2 — Add Reviewer Form

Attach the form reviewers will use to evaluate each submission. Only forms with

Form Type: Review are eligible. Selecting a reviewer form is optional but recommended whenever applications are scored.

1. On the Add Reviewer Form step, click **Select Reviewer Form**
2. Choose a Review-type form from the dropdown
3. (*Optional*) Configure reviewer assignment rules (e.g., number of reviewers per applicant)
4. Click **Next** to proceed

Step 3 — Add Pre-assessment

Attach an Assessment applicants must complete as part of the application package, or any other pre-application requirement. This step is optional.

1. Click **Select Pre-assessment**
2. Choose an existing Assessment from the dropdown, or skip
3. (*Optional*) Configure timing rules
4. Click **Next** to proceed

Step 4 — Preview

Review the full application package end-to-end: applicant-facing form, reviewer form, linked pre-assessment, and the dates.

Step 5 — Create

Click **Create** to publish the application package. Applicants can begin submitting on the configured Open Date.

Important — Once an application is created and the Open Date has passed, applicants can begin submitting. Edits to the application form, reviewer form, or pre-assessment after this point may affect already-submitted applications.

3.4.4 Reviews

Clicking **View Evaluation** on the Reviews card opens the review queue for the cohort. This is where reviewers see assigned applications and where Program Coordinators monitor review progress.

What you can do here:

- View submissions and their review status (Pending / In Progress / Completed)
- Open an individual submission to score it against the reviewer form / rubric
- Reassign reviewers if needed
- Export evaluation results to CSV
- Calibrate scoring across reviewers using aggregated views

3.4.4.1 Create Review

The screenshot shows the 'New Review' form. The sidebar on the left lists the steps: 'Basic Info' (selected), 'Assign Examiners and Form', and 'Users and Finishing Up'. The 'Basic Info' section includes the following fields:

- Title**: A text input field with the placeholder 'Write the review title here'.
- Duration**: A date range selector with 'Start Date' and 'End Date' fields.
- Review Type**: A dropdown menu.
- Image**: A section with a 'Select Existing Image' button and a 'Select Image' button. Below these is a large area with a red folder icon and the text 'Click or drag file to this area to upload'.
- Description**: A rich text editor with a toolbar containing various formatting options.

A 'Next' button is located at the bottom left of the sidebar.

A review configuration ties a Review-type form to a set of submissions and a roster of reviewers.

Steps:

1. Click **+ Create** on the Reviews view
2. Enter a **Review Name** and optional description
3. Select the **Review Form** (Form Type: Review) from Assets
4. Select which application or pool of submissions the review applies to
5. Assign reviewers individually or in bulk

6. (Optional) Set reviewer assignment rules — number of reviewers per submission, blind review, etc.

7. Click **Create** to start the review cycle

Tip — Use *blind review* (reviewers cannot see each other's scores) to reduce anchoring bias when multiple reviewers score the same submission.

3.4.5 Assessment

Cohort A Management > Assessment

Assessment List

1 Assessment [+ New](#)

Search here

#	Assessment Title	Reviewers	Created Date	Status	Action
1	Initial Assessment Qualified	T	May 21, 2025	Not Completed	View Edit

Clicking **View Assessment** on the Assessment card opens the management view for assessments. This is the operational counterpart to the Dashboard's Assessment card — Dashboard is for monitoring, Management is for configuring.

What you can do here:

- View a list of all assessments configured for the cohort
- Open an assessment to see its full configuration and results
- Create a new assessment using **+ Create**
- Edit, duplicate, or archive an existing assessment

3.4.5.1 Create Assessment

6. (Optional) Configure scoring rules and pass/fail thresholds

7. (Optional) Link the assessment to an application as a pre-assessment (see § 3.4.3.1)

Step 4 — Finish

8. Click **Create** to publish the assessment

Important — Only Qualified questions should be used in live assessments. Use the Question Bank Overview to confirm the qualified-question coverage for each type and level before publishing.

3.4.6 Surveys

Clicking **View Surveys** on the Surveys card opens the survey management view. Surveys can be sent at any stage of the cohort to collect feedback — for example, an applicant satisfaction survey after submission, or a post-program evaluation.

What you can do here:

- View a list of all surveys configured for the cohort
- Open a survey to see configuration and responses
- Create a new survey using **+ Create**
- Edit, duplicate, or archive existing surveys

3.4.6.1 Create Survey

Step 1 — Basics

1. Click + **Create** on the Surveys view
2. Enter a **Survey Name** and optional description
3. Select the **Survey Form** (Form Type: Survey) from Assets
4. Select the audience for the survey (e.g., all applicants, accepted applicants only, specific cohort segment)
5. Set the **Open Date** and **Closing Date** for the survey window
6. (*Optional*) Configure reminder emails for non-respondents

7. Click **Create** to publish the survey
