

Leap — Staff Guide

Tenx Documentation

Leap — User Guide (*Coming soon*)

Coming soon — the full Leap user guide is in preparation.

Leap is the career readiness and job matching platform within the Tenx ecosystem. It helps trainees transition from training into professional careers through intelligent job recommendations, profile building, **interview preparation**, and career development tools.

What It Does

Leap connects trained talent with career opportunities. Trainees use it to build professional profiles, explore job listings, receive personalized job recommendations, and prepare for career transitions. Staff use it to manage job listings, track placement outcomes, and support trainee career journeys.

Key capabilities:

- Job browsing and intelligent job recommendations
- Professional profile building and competency extraction
- Interview preparation with AI HR persona
- Career scenario simulation and coaching
- CV analysis and enhancement
- Monitoring and notification services for engagement

Leap — Staff Guide (*Coming soon*)

Coming soon — the Leap staff guide is in preparation.

This page will cover every staff-side workflow on Leap once it's published — managing job listings, running interview rounds, tracking placements, and supporting trainees.
