

Management Dashboard — User Guide

[Tenx Documentation](#)

Management Dashboard — User Guide

The Management Dashboard is the administrative control center for the Tenx Platform. It provides program managers and operations staff with comprehensive oversight across all programs, cohorts, and platform services.

What It Does

The dashboard enables administrators to manage training programs end-to-end — from setting up new cohorts and configuring services to monitoring ongoing operations. It serves as the central hub for operational decision-making.

Key capabilities:

- Program and cohort management across the full talent lifecycle
- Service monitoring and operational oversight
- Cross-platform reporting that spans Apply, Tenx Learning, and Leap
- Role-based access control for organization staff
- Real-time operational metrics and service health checks

Management Dashboard — Organization Guide *(Coming soon)*

Coming soon — fill in the content from the Management Dashboard user guide PDF when it's ready. Mirror the structure used in Tenx Learning Staff Guide and Apply Staff Guide.

This guide will cover every workflow available to organization administrators (Program Managers and Operations staff) on the Management Dashboard.

New here? Read the Management Dashboard overview first.

Logging In

Placeholder — Management Dashboard login

1. Open the Management Dashboard URL provided to your organization
2. Enter your registered staff email and password
