

Tenx Learning — Staff Guide

Tenx Documentation

Tenx Learning — User Guide

This guide walks both **staff** and **trainees** through every feature of the Tenx Learning platform — from logging in to grading assignments.

Download the full user guide (PDF){ .md-button .md-button--primary
download="Tenx-Learning-User-Guide.pdf" }

1. Getting Started

1.1 Overview of Tenx Learning

Tenx Learning is a scalable Learning Management System (LMS) designed to deliver high-quality training to a large number of learners efficiently. It enables organizations to manage learning content, track trainee progress, and streamline assessment and feedback processes.

The platform supports the full learning lifecycle — from onboarding to assignment submission and performance tracking — while maintaining consistency, scalability, and cost-effectiveness.

1.2 User Roles (Trainee vs Staff)

Tenx Learning is designed for two primary user roles:

Trainee

Trainees use the platform to:

- Access learning content (Onboarding, Topics, Modules)
- Complete assignments
- View grades and feedback
- Track progress through dashboards and leaderboards

Staff

Staff (Admins, Instructors, Reviewers) use the platform to:

- Manage trainees and batches
- Create and organize content
- Assign and review assignments
- Provide feedback and grading
- Monitor overall performance and engagement

1.3 System Requirements

To use Tenx Learning effectively, ensure the following:

- A modern web browser (Chrome, Firefox, Edge, or Safari)
- Stable internet connection
- Desktop or laptop recommended for best experience

1.4 How to Access the Platform

Access to Tenx Learning is provided after subscribing to the platform.

- After purchasing a subscription, you will receive your unique platform link

Access Steps:

1. Open your web browser
2. Enter the provided platform link
3. Proceed to the login page

Don't Have Access Yet?

If you do not yet have access and would like to use Tenx Learning:

- Contact support at: **support@10academy.org**
- Request access or subscription details

2. Authentication

2.1 Login

The login process allows users (Trainees and Staff) to securely access the Tenx Learning platform.

🏠 / login

10 Academy ©2026

Steps to Log In:

1. Open your web browser
2. Navigate to your Tenx Learning platform link
3. On the login page:
 - Enter your registered email address
 - Enter your password
4. Click the **Login** button
5. Upon successful login, you will be redirected to your dashboard

2.2 Password Management

Write your email address

Done

Already have an account? [Log in](#)

1

Enter your registered email address

Steps to Reset Password:

1. Navigate to the Login page
2. Click on **Forget Password** (below the Login button)
3. Enter your registered email address
4. Click **Done / Send Reset Link**
5. Check your email inbox for the password reset link

Check your Inbox

Greetings! We've received a request to reset your password. Kindly follow the instructions sent to your inbox at [el@10academy.org](#) to proceed.

6. Click the link provided in the email
7. Enter a new password
8. Confirm the new password

9. Click **Submit / Save**

Tenx Learning — Staff Guide

This guide covers every staff-side workflow: home dashboard, content creation (onboarding, topics, modules, prompts, rubrics, assignments), grading, and trainee management.

New here? Read the overview, login, and password reset first.

Logging In as Staff

Staff use the same login screen as trainees — credentials determine the role.

🏠 / login

10 Academy ©2026

1. Open
2. Enter your registered staff email and password
3. Click **Login**
4. You will be redirected to the **Staff Dashboard** below

If you've forgotten your password, see Password Reset on the overview page.

3.1 Home Page

The Home page provides staff with a centralized view of trainee performance, attendance, participation, and submission summaries. It enables quick monitoring and data-driven decision-making.

3.1.1 Home Page Highlights

- **Batch Selector** — Switch between training batches to view relevant data
- **Navigation Menu** — Access key modules such as Content, Leaderboard, Grade, and Trainee
- **User Profile** — Manage account settings and log out
- **Notifications** — View system alerts and updates
- **Passed Modules Filter** — Filter trainees who have completed modules
- **Trainee Data Table** — Review performance metrics in a structured format
- **Performance Metrics** — Monitor grades, attendance, participation, and submissions

3.1.2 View Trainee Performance

1. Locate the **Batch Selector** at the top of the dashboard
2. Select the desired batch from the dropdown list
3. Review the **Trainees Data** section
4. Analyze trainee performance using the available columns

3.2 Content Page

The Content Page enables staff to create, manage, and organize learning materials within the Tenx Learning platform. It provides a centralized overview of all educational resources, ensuring efficient content delivery and structured learning paths.

3.2.1 Content Page Highlights

Content Type	Description
Topics	Create, view, and manage subject areas that organize modules and assignments
Modules	Create and structure learning materials within each topic
Assignments	Manage assessments and evaluate trainee performance
Prompts	Create and manage AI-powered prompts used in assignments and evaluations
Rubrics	Define grading criteria to ensure consistent and fair assessments
Onboarding	Manage introductory materials designed to guide trainees at the start of their learning journey

- **View Button** — Access detailed pages to create, edit, or manage each content type
- **Content Counters** — Display the total number of Topics, Modules, Assignments, Prompts, Rubrics, and Onboarding materials available in the system

3.2.2 Manage Onboarding

The Onboarding module allows staff to create and manage introductory materials that guide trainees at the start of their learning journey.

View Onboarding Content

1. Navigate to the **Content** page from the left sidebar
2. Locate the **Onboarding** card
3. Click **View** to access the onboarding list
4. Review available onboarding entries
5. Use the edit icon to modify existing content if needed

Create Onboarding Content

The screenshot shows the 'Create Onboarding Content' form. The left sidebar is the same as the previous screenshot. The main header shows 'Batch 1' and a notification icon. The main content area has a breadcrumb 'On Boarding / Create' and a progress bar with three steps: Basic Info, Sections, and Preview. The 'Basic Info' step is active. The form has the following fields: Title (with a callout 'Enter onboarding details'), Description, Form, Date, Select Onboarding type (with a callout 'Add onboarding content'), Select Content type (with a callout 'Select Content Type: Section or Link'), and Topic. The 'Next' button is highlighted in red.

B *I*

For Week 0, you will need to join our Slack group as well as the tenx platform. All sessions will run within the UTC time zone. To check the timezone offset to your country's time zone, consider this resource: https://en.wikipedia.org/wiki/List_of_UTC_time_offsets.

Our first session will be held on Wednesday, 05 November 2025, starting at 9:30 AM UTC (12:30 PM EAT) - please log in here: <https://meet.google.com/yyx-dhfn-dpr>

1. In the Sections step, enter the **Section Title**
2. Add content using the **Rich Text Editor** or **Markdown**
3. Include links, schedules, and instructions as needed
4. Click **+ New Section** to add additional sections
5. Click **Next** to continue

Preview & Publish Onboarding Content

1. Click **Next** after completing the Sections step
2. Navigate to the **Preview** stage
3. Review all entered information and formatting
4. Verify dates, links, and content visibility
5. Click **Create** to finalize, or **Back** to make edits
6. Ensure the **Trainees Can View** option is enabled

3.2.3 Manage Topics

The Topics module allows staff to organize learning content into structured categories. Topics act as containers for modules and help group related learning materials.

View Topics

1. Navigate to the **Content** page from the left sidebar
2. Select the **Topics** section
3. View available topics in:
 - **Card View** (default visual layout)
 - **Table View** (structured list format)

4. Use the search bar to find specific topics
5. Use sorting and filtering options if available

Create Topic

The screenshot shows the 'Create Topic' interface. On the left is a sidebar with navigation links: Home, Content, Leaderboard, Grade, and Trainee. The main area displays a list of topics, including 'AI for Planning' and 'AI for Bid'. The 'New Topic' form on the right contains the following fields and callouts:

- Topic Name:** A text input field with a callout 'Enter topic title'.
- Description:** A text area with a callout 'Add topic details'.
- Pre-requisite (Optional):** A dropdown menu with a callout 'Select dependencies'.
- Is Private:** A toggle switch with a callout 'Restrict access'.
- Create:** A button at the top right with a callout 'Create topic'.

1. Navigate to the **Content** page
2. Click on the **Topics** section
3. Click **+ Create**
4. Fill in the required **Basic Information**:
 - **Topic Name** — A clear and descriptive name
 - **Description** — A brief explanation of what the topic covers
 - **Pre-requisite** (optional) — Existing topics that must be completed first
 - **Is Private**:
 - Enable to restrict access to assigned trainees only
 - Disable to make it available to all trainees
5. Click **Save** to create the topic

Topic Details

The Topic Details page provides an overview of a specific topic and allows staff to manage its modules and assigned trainees.

Access Topic Details

1. Navigate to the **Content** page from the left sidebar
2. Go to the **Topics** section
3. Click on a Topic card (e.g., *AI for Planning*)

Outcome: Opens the Topic Details page with modules and trainee information.

Basic Information displayed:

- Topic Title (e.g., *AI for Planning*)
- Breadcrumb Navigation (Content / Topic / Topic Name)
- Modules List
- Trainee Assignments (Tab)

Each module includes:

- Module name
- Duration (e.g., 10h 40m)
- Number of assignments
- Timeline (e.g., 16 Days)
- Requirement status (Required)

Assign Trainees to Topic

Staff can control which trainees have access to a topic and monitor their progress.

View Assigned Trainees

1. Navigate to the **Topic Details** page
2. Click the **Trainees** tab
3. Review the assigned trainees list showing Name, Progress, and Remark columns

Add Trainees

1. Navigate to the **Trainees** tab within Topic Details
2. Click **+ Add Trainees**
3. The Add Trainees panel opens on the right with a list of available trainees (Name and Email)
4. Use the search icon to find specific trainees

5. Select one or more trainees using the checkboxes
6. Use pagination at the bottom to browse the full trainee list
7. Click **+ Add** to confirm selection

3.2.4 Manage Modules

The Modules page allows staff to create, view, and manage learning materials within Tenx Learning. Modules are structured learning units associated with topics.

View Modules

1. Navigate to the **Content** page from the left sidebar
2. Click **View** under the Modules card
3. View available modules in:
 - **Card View** (default visual layout)
 - **List View** (structured list format)
4. Use the **Search** bar to find specific modules
5. Use the **All** dropdown to filter modules

Create Module

1. Navigate to the **Modules** page
2. Click **+ Create**
3. A dropdown menu appears with the following options:
 - **Section** — Create a new section within a module
 - **Attachment** — Add an attachment to a module
 - **Module** — Create a new module manually
 - **Module with AI** — Create a module using AI-assisted generation
4. Select the desired option
5. Enter the required details
6. Click **Save**

Create Section

1. Navigate to the **Modules** page

2. Click **+ Create** → **Section**

3. Fill in the required information:

- **Title (required)** — Section title
- **Tag (required)** — e.g., Template, Business need, Team, Competency
- **Has Feedback** — Toggle to enable feedback for this section
- **Type** — e.g., Content

4. Add content in the **Section Content** area:

- Use the **Rich Text Editor** for formatted content (bold, italic, links, alignment, lists, tables, quotes, media, undo/redo)
- Switch to **Markdown** for markdown-based content entry

5. Optionally add references:

- Click **+ Extract References** to extract them from the content
- Click **+ Add References** to add them manually

6. Click **Create** to save the section

Displays all available sections in the system.

Edit the selected section.

Create a copy of the selected section.

#	Title	Tag
1	Introduction	week 6-technical
2	References	week 6-technical
3	Tutorial Schedule	week 6-technical
4	Late policy	week 6-technical
5	Due Dates (Submission)	week 6-technical
6	Deliverables and Tasks to be done	week 6-technical
7	Key Dates	week 6-technical
8	Team	week 6-technical

Select resource category

Select attachment icon

Create Attachment

Save and create the attachment

1. Navigate to the **Modules** page
2. Click **+ Create** → **Attachment**
3. Fill in the required information:
 - **Title** (required)
 - **Tags** (required)
 - **Content Type** (required) — e.g., Rich Text / Markdown
 - **Resource Type** (required) — e.g., Tutorials
 - **Icon** (required) — e.g., General Attachment

4. Add content in the **Content** area (Rich Text or Markdown)

5. Click **Create Attachment**

The screenshot shows the 'Modules' page in a learning management system. The page has a sidebar with 'Home', 'Content', 'Leaderboard', 'Grade', and 'Trainee'. The main content area shows a table of modules. Callouts highlight the '+ Create' button, the 'Attachment' tab, and the 'Edit' and 'Copy' icons for a selected module.

#	Title	Tag
1	Peer Mentorship	Peer Mentorship

4	Decision-making	Decision-making
5	Effective Communication	Effective Communication
6	Effective Communication	Effective Communication
7	CV	cv
8	CV	CV
9	T-shaped Professional	T-shaped Professional

Create Module (Manual)

The screenshot shows the 'Create Module' form in a learning management system. The form is divided into 'Basic Info' and 'Sections' sections. Callouts highlight various fields and buttons, including 'Enter module name', 'Select module category', 'Select difficulty level', 'Optional module description', 'Choose Section or Link', 'Assign to topic', and 'Add supporting resources'.

Basic Info

- Title**: Enter module name
- Type**: Select module category
- Level**: Select difficulty level
- Pre-requisite Module (Optional)**: Set required modules

Sections

- SubTitle**: Optional module description
- Select Content type**: Choose Section or Link
- Topic**: Assign to topic
- Attachment**: Add supporting resources

1. Navigate to the **Modules** page

2. Click **+ Create** → **Module**

3. In the **Basic Info** step, fill in:

- **Title** (required) — Module name
- **Subtitle** — Short description or context
- **Type** (required) — Module type (dropdown)

- **Content Type** (*required*):
- **Section** — Structured internal content
- **Link** — External resource
- **Level** — Beginner / Intermediate / Advanced
- **Topic** — Assign the module to a topic
- **Pre-requisite Module** (optional)
- **Attachment** (optional) — *Select Attachment* (existing) or *Create Attachment* (new)

Sections Step (Add Content)

After Basic Info, the **Sections** step lets staff attach existing sections or create new ones that define the module's learning content.

Trainees Step (Assign Module)

After adding sections, the **Trainees** step assigns the module to specific trainees.

Available actions:

- **A. Assign Trainees** — Select individual trainees with checkboxes, or use the header checkbox to select all
- **B. Filter Trainees** — Use the Trainee Status dropdown or search icons
- **C. Finalize Module** — Click **Create** to complete; the module is assigned to selected trainees

Create Module with AI

The **Module with AI** option auto-generates module content from an uploaded document or URL.

Available actions:

- **A. Upload Document** — Click **Upload Document**, drag-and-drop or select. Supported: .docx, .pdf, .txt. Max 10 MB
- **B. Use URL Link** — Switch to the URL Link tab; enter an accessible resource URL
- **C. Select Topic** — Choose a topic to categorize the generated module
- **D. Add Pre-requisite (optional)** — Modules that must be completed first
- **E. Generate Module** — Click **Create Module**; the system processes the input and generates structured content

Modules List View

The Modules page provides a centralized view of all created modules, sections, and attachments.

Available actions:

- **A. Create Content** — Click **+ Create** and choose Module, Section, Attachment, or Module with AI
- **B. View Sections** — Navigate to the **Section** tab; browse, search
- **C. Edit Section** — Click the edit icon next to a section, modify, save
- **D. Copy Section** — Click the copy icon to create a duplicate

Modules List View — Attachment Tab

The **Attachment** tab displays uploaded and created attachments that can be reused across modules.

Available actions:

- **A. Create Attachment** — Same flow as above
- **B. View Attachments** — Browse attachments with file-type icons
- **C. Edit Attachment** — Click to update content or metadata
- **D. Duplicate Attachment** — Click the duplicate icon

3.2.5 Manage Assignments

See the full Assignment Management workflow in § 3.2.8 below.

3.2.6 Manage Prompts

The Prompt Management page allows staff to create, view, and manage AI prompts used within the platform — in assignments, evaluations, and AI-assisted workflows.

The screenshot shows the 'Prompt Management' page in a web application. The interface includes a sidebar with navigation links: Home, Content (active), Leaderboard, Grade, and Trainee. The main content area is titled 'Prompt Management' and has two tabs: 'Prompt' (active) and 'Templates'. Below the tabs, there are two buttons: '+ Create' and '+ Create Criterion With Templates'. A search bar is located to the right of these buttons. The main list displays a table of prompts with columns for ID, Title, Model, and Date. The table contains 10 rows of prompts, including titles like 'Intelligent Complaint Analysis for Financial Services Final GitHub' and 'Improved detection of fraud cases for e-commerce and bank transactions Final GitHub'. To the right of the table is a 'Prompt Preview' panel. Callouts with speech bubbles provide additional context: 'Displays all created prompts.' points to the main table; 'Create a new prompt manually.' points to the '+ Create' button; 'Create prompts using predefined templates.' points to the '+ Create Criterion With Templates' button; 'Displays the content of the selected prompt.' points to the 'Prompt Preview' panel; and 'Preview the selected prompt content.' points to the preview area within the panel.

ID	Title	Model	Date
39	Intelligent Complaint Analysis for Financial Services Final GitHub	ChatGPT	August 26, 2025 6:11:46 PM
38	Intelligent Complaint Analysis for Financial Services Final Report	ChatGPT	August 26, 2025 6:09:15 PM
37	Improved detection of fraud cases for e-commerce and bank transactions Final GitHub	ChatGPT	August 26, 2025 5:45:33 PM
36	Improved detection of fraud cases for e-commerce and bank transactions Final Report	ChatGPT	August 26, 2025 5:42:00 PM
35	sentiment_rubrics_interim_git	ChatGPT	May 18, 2025 1:51:50 PM
34	telecome_interim_code	ChatGPT	May 7, 2025 2:19:40 PM
33	telecome_final_code	ChatGPT	May 7, 2025 2:17:07 PM
32	telecome_intrime_report	ChatGPT	May 7, 2025 2:11:39 PM
31	telecom_final_report	ChatGPT	May 7, 2025 1:55:27 PM
30	sentiment_interim_report	ChatGPT	

Available actions:

- **A. Create a New Prompt** — Click **+ Create**, enter details, save
- **B. Create Prompt Using Templates** — Click **+ Create Criterion With Templates**, select a template, customize, save
- **C. View Prompt Details** — Click the view icon to open the Prompt Preview panel
- **D. Search Prompts** — Use the search bar to find by title or keyword
- **E. Switch to Templates** — Click the **Templates** tab to browse reusable structures

3.2.6.1 Prompt Preview

The screenshot shows the 'Prompt Management' page in the 'Prompt Engineer' section. A table lists various prompts with their titles, sources (e.g., ChatGPT), and timestamps. A callout points to an eye icon in the table, stating: 'Click to load and display the prompt in the preview panel.' Another callout points to the 'Prompt Preview' panel on the right, stating: 'Displays the full content of the selected prompt.' The preview panel shows the full text of a selected prompt, including instructions and evaluation criteria.

The Prompt Preview panel allows staff to view the full content of a selected prompt before using or editing it.

Available actions:

- **A. View Prompt Content** — Click ; the prompt content appears in the preview panel
- **B. Review Prompt Details** — Read the full instructions; verify structure, criteria, and formatting
- **C. Compare Prompts** — Select different prompts; the preview updates dynamically

3.2.6.2 Create Prompt

The screenshot shows the 'Create Prompt' page. It features a large text area for writing the prompt, a 'Metrics' dropdown, and a 'Preview' section. Callouts explain the following elements:

- 'Main text area to write the prompt instructions and content.' (points to the large text area)
- 'Select evaluation metrics or criteria to include in the prompt.' (points to the 'Metrics' dropdown)
- 'Remove a section or block from the prompt.' (points to a trash icon)
- 'Add a new section/block within the prompt structure.' (points to a '+ New' button)
- 'Enter a name for the prompt.' (points to the 'Title' field)
- 'Select the model the prompt is intended for.' (points to the 'Target' dropdown)
- 'Assign tags to categorize the prompt.' (points to the 'Tag' dropdown)
- 'Save and create the prompt.' (points to the 'Save' button)
- 'Displays a preview of the prompt.' (points to the 'Preview' section)

1. Navigate to **Prompt Management**
2. Click **+ Create**

3. In the Prompt Editor, enter the prompt content
4. (Optional) Use **Metrics** to include evaluation criteria
5. Click **+ New** to add structured sections if needed
6. Fill required fields:
 - **Title**
 - **Target**
 - **Tag**
7. Review the prompt in the Preview panel
8. Click **Save** to create the prompt

3.2.6.3 Create Criterion with Templates — Criteria Template Step

When creating prompts using templates, the **Criteria Template** step lets staff pick a predefined evaluation template.

Available actions:

- **A. Select Criteria Template** — Choose from available templates
- **B. Handle Empty State** — If none exist, create a new template first, then return to this step
- **C. Proceed to Next Step** — Click **Next** to move to the Editable step and customize

3.2.6.4 Templates Tab (Criteria Templates Management)

The **Templates** tab lets staff create and manage reusable criteria templates.

Available actions:

- **A. Create a New Template** — Click **+ Create Template**, define criteria, save
- **B. Manage Templates** — View existing, select for prompt creation, edit, reuse

3.2.6.5 Create Template

1. Navigate to **Prompt Management** → **Templates**
2. Click **+ Create Template**
3. In the **Editable** tab, define the template structure and criteria
4. (Optional):
 - Use the **Metric** tab to configure evaluation metrics
 - Use the **Parameter** tab to add dynamic variables
5. Use **+ New** to add sections or blocks
6. Use **Import** to include predefined criteria
7. Fill required fields: Title, Target, Tag
8. Review the template in the Preview panel
9. Click **Save**

3.2.7 Manage Rubrics

The Rubrics page allows staff to create and manage evaluation criteria used for grading trainee submissions. Two types are supported: **Smart Rubrics** (AI-assisted) and **Manual Rubrics**.

The screenshot shows the 'Rubrics' management page. A sidebar on the left contains navigation links: Home, Content (selected), Leaderboard, Grade, and Trainee. The main content area is titled 'Rubrics' and has a '+ Create' button. Below this, there are two tabs: 'Smart Rubrics' (selected) and 'Manual Rubrics'. A table lists various rubrics with columns for DBID, Title, and creation date. Callouts provide the following information:

- Create a new rubric.**: Points to the '+ Create' button.
- Displays rubrics used for manual grading by staff.**: Points to the 'Manual Rubrics' tab.
- Displays AI-powered rubrics used by the grader system.**: Points to the 'Smart Rubrics' tab.
- Remove the rubric.**: Points to the delete icon (trash can) in the rubric table.
- Create a copy of the rubric.**: Points to the duplicate icon (two overlapping squares) in the rubric table.
- Preview rubric details.**: Points to the eye icon in the rubric table.

Available actions:

- **A. Create Rubric** — Click **+ Create**, choose type (Smart or Manual), define criteria, save
- **B. View Rubric** — Click to review structure and criteria
- **C. Duplicate Rubric** — Click the duplicate icon, modify if needed
- **D. Delete Rubric** — Click , confirm

3.2.7.1 Rubric Preview

The screenshot shows the 'Rubric Preview' panel. The left sidebar is identical to the previous screenshot. The main content area shows a table of rubrics. A red box highlights the 'Improved detection of fraud cases for e-commerce and bank transactions Final Report' rubric. A callout points to the eye icon next to it, stating: 'Click to load the rubric into the preview panel.' To the right, the 'Rubric Preview' panel is displayed, showing the rubric's structure and scoring criteria. Callouts provide the following information:

- Displays the full rubric details for the selected item.**: Points to the 'Rubric' header in the preview panel.
- Indicates the rubric was generated used Model**: Points to the 'ChatGPT' label in the preview panel.

The preview panel shows the following structure:

- Project Under...** / 5
- Critical Thinki...** / 5
- Result and Int...** / 10

The rubric content is as follows:

Prompt
Project Understanding
Expected qualities of the report are as follows:

1. Thorough understanding of the problem and the methodology used to solve it like clear rationale for choices made in the project and how challenges were overcome.
2. Clear definition of the problem, including its scope, significance, and the specific challenges it presents.
3. Breaking down complex issues into manageable parts and systematically addressing them.

Point: 5, Value: High: Excellently addresses all the expected qualities

The Rubric Preview panel shows the detailed structure and scoring criteria of a selected rubric.

Available actions:

- **A. View Rubric Details** — Click ; rubric content appears in preview panel

- **B. Review Evaluation Criteria** — Analyze each criterion and scoring range
- **C. Review Prompt Instructions** — Read the description; verify clarity
- **D. Compare Rubrics** — Select different rubrics; preview updates dynamically

3.2.7.2 Create Rubric Options

Batch 2

Home

Rubrics / Create

Content

Leaderboard

Grade

Trainee

Basic Info

Prompt

Add Dummy Rubrics

General Info

Enter the rubric title.

Assign tags for categorization

Select model used for evaluation

Define the rubric type (e.g., Code, report, etc.).

Select the challenge document associated with the rubric.

The + **Create** button opens a dropdown with three options:

Option	Use case
A. Rubrics <i>(Standard Creation)</i>	Create manually — define criteria, scoring levels, descriptions. Suitable for structured grading
B. Rubrics with AI	Generate automatically using AI; saves time, can be edited after generation. Best for quick setup and standardized evaluation
C. Manual Rubrics	Designed for staff-based grading — instructors evaluate submissions themselves. Provides flexibility for subjective assessments

Steps:

1. Navigate to the **Rubrics** page
2. Click + **Create**
3. Select one of the options
4. Enter rubric details and criteria
5. Save the rubric

3.2.7.3 Create Rubric — Basic Info

The screenshot shows the 'Rubrics' section of a learning management system. The left sidebar contains 'Home', 'Content', 'Leaderboard', 'Grade', and 'Trainee'. The main area is titled 'Rubrics' and has a '+ Create' button. Below this, there are two tabs: 'Rubrics' and 'Manual Rubrics'. The 'Rubrics' tab is active, showing a list of rubrics. Callouts explain the following steps:

- Opens the rubric creation options menu.** (Points to the '+ Create' button)
- Create a standard rubric manually.** (Points to the 'Manual Rubrics' tab)
- Generate a rubric automatically using AI** (Points to the 'Rubrics with AI' tab)
- Create a rubric specifically for manual grading by staff.** (Points to the 'Manual Rubrics' tab)

The rubric list includes items like 'Intelligent Complaint Analysis for Financial Services Final GitHub', 'Improved detection of fraud cases for e-commerce and bank transactions Final Report', and 'sentiment_rubrics_interim_git'. The right panel shows a 'Rubric' form with a 'ChatGPT' button and a 'Prompt' section.

1. Navigate to **Rubrics** → **+ Create**
2. Select the desired creation method
3. In the **Basic Info** step:
 - **Name** — Descriptive title
 - **Tag** — Categorize the rubric
 - **Target** — Evaluation system
 - **Type** — Rubric category
4. (Optional) Select a **Challenge Document** to link with an assignment
5. Click **Next** to proceed to the Prompt step

3.2.7.4 Create Rubric — Prompt Step

The Prompt step is where you define the evaluation criteria and instructions used for grading.

1. After Basic Info, proceed to the **Prompt** step
2. Click **+ New** to add a new evaluation criterion
3. Enter the prompt or criteria details
4. (Optional) Click **Import** to load predefined criteria
5. Review the structure in the Preview panel
6. Repeat to add multiple criteria
7. Click **Next**

3.2.7.5 Create Rubric — Add Dummy Rubrics

The final stage of rubric creation defines or reuses scoring structures (dummy rubrics).

Available actions:

- **A. Select Dummy Rubric from List** — Use the radio button, review with , apply
- **B. Create from JSON** — Switch to the **Create from JSON** tab; paste or upload a JSON structure
- **C. Finalize Rubric** — Click **Done**; rubric is created with Basic info + Prompt criteria + Scoring structure

3.2.7.6 Create Rubrics with AI — Basic Info

1. Navigate to **Rubrics** → **+ Create** → **Rubrics with AI**
2. In **Basic Info**, enter:
 - **Name** — Descriptive rubric title
 - **Tag** — Category
 - **Target** — AI system (e.g., ChatGPT)
 - **Type** — Rubric category
3. (Optional) Select a Challenge Document to guide AI generation
4. Click **Next**

Finalize and save the rubric.

1. Review the generated rubric in the **Generated Rubrics** panel
2. *(Optional)* Modify the prompt in the Prompt field to improve results
3. Click **Regenerate** if changes are needed
4. *(Optional)* Click **Edit JSON** for advanced customization
5. Once satisfied, click **Done** to save

3.2.7.10 Create Manual Rubrics

The screenshot shows the 'Rubrics / Create' page. On the left is a sidebar with 'Home', 'Content', 'Leaderboard', 'Grade', and 'Trainee'. The main area has a 'Rubric Only' dropdown, an 'Import JSON file' section with a 'Choose File' button (labeled 'No file chosen'), a large text area for the rubric, and a 'Rubric title' field. A 'Save' button and a 'Cancel' button are at the top right. Five callouts provide instructions: 1. 'Select the rubric format or mode.' points to the 'Rubric Only' dropdown. 2. 'Upload a JSON file containing predefined rubric structure.' points to the 'Choose File' button. 3. 'Enter or paste rubric structure manually in JSON format.' points to the large text area. 4. 'Provide a name for the rubric.' points to the 'Rubric title' field. 5. 'Save the manually created rubric.' points to the 'Save' button.

The Manual Rubrics option allows staff to create rubrics without AI assistance — defining criteria using JSON or manual input. Use it when full control over rubric structure and scoring is required.

1. Navigate to the **Rubrics** page
2. Click **+ Create** → **Manual Rubrics**
3. Select the rubric mode (e.g., Rubric Only)
4. Choose one of:
 - Upload a JSON file using **Choose File**, OR
 - Paste/type rubric JSON into the Rubric field
5. Enter a **Rubric Title**
6. Click **Save**

3.2.8 Assignment Management

The Assignment page provides a centralized view of all assignments — staff can filter, search, and manage them efficiently.

Steps to use the Assignment page:

1. Navigate to the **Content** page
2. Click on **Assignment**
3. View the list of available assignments
4. Use the **All** dropdown to filter by Topic
5. Use **Search** to find a specific assignment
6. Click the edit icon to modify an assignment
7. Click **+ Create** to add a new one

3.2.8.1 Create Assignment Options

The screenshot shows the 'Create Assignment' page, which is divided into three main sections: Basic Info, Select Trainees, and Rubrics. Callouts provide the following information:

- 'Define the subject/topic of the assignment.' points to the 'Topic' field.
- 'Enter the name/title of the assignment.' points to the 'Assignment Name' field.
- 'Select assignment type (e.g., Technical, Non-Technical)' points to the 'Type of Assignment' dropdown.
- 'Date when the assignment becomes visible to trainees.' points to the 'Open Date' field.
- 'Deadline for submission' points to the 'Closing Date' field.
- 'Final cutoff date (after due date)' points to the 'Due Date' field.
- 'Maximum number of submission attempts allowed.' points to the 'Max Edits' field.
- 'Expected daily effort required from trainees.' points to the 'Minutes Per Day' field.
- 'Attach a form/template used for submission.' points to the 'Form' dropdown.
- 'Select the assignment/challenge description document.' points to the 'Challenge Document' dropdown.
- 'Set assignment status: Not Started, On Going, or Completed.' points to the 'Status' radio buttons.
- 'Select reviewer(s) responsible for grading.' points to the 'Reviewers' dropdown.
- 'Toggle to enable custom submission message.' points to the 'Set Submission Status Message' toggle.

The **+ Create** button opens a dropdown with two options:

1. Navigate to the **Assignment** page
2. Click **+ Create**
3. Choose:
 - **Assignment** → Manual creation
 - **Assignment with AI** → AI-assisted creation
4. Proceed to the corresponding flow

3.2.8.2 Create Assignment — Basic Info

The screenshot shows the 'Assignment' page in a learning management system. The page has a sidebar with navigation links: Home, Content, Leaderboard, Grade, and Trainee. The main content area is titled 'Assignment' and includes a '+ Create' button. Below the button is a table of assignments. Two callouts highlight the '+ Create' button and the 'Assignment with AI' option.

#	Assignment	Status	Action
1	Assignment with AI	Ongoing	
2	Assignment with AI	Ongoing	
3	Assignment with AI	Ongoing	
4	Assignment with AI	Ongoing	
5	Assignment with AI	Ongoing	

This screen captures all essential details before assigning trainees and attaching rubrics.

1. Enter **Assignment Name**
2. Select **Type of Assignment** and **Topic**
3. Set **Status** (default is usually *On Going*)
4. Define timeline:
 - **Open Date**
 - **Due Date**
 - **Closing Date**
5. Configure limits:
 - **Minutes per day**
 - **Max edits**
6. Assign **Reviewers**
7. Select **Form** and **Challenge Document**
8. (Optional) Enable **Submission Status Message**
9. Click **Next**

3.2.8.3 Create Assignment — Select Trainees

When enabled, automatically selects trainees associated with the chosen challenge document.

Select individual trainees.

Displays all available trainees.

☐	Name	email	Action
☐	Mohamed Abdallah mohamed.abdallah@libya.com	mohamed.abdallah@libya.com	
☐	Hana Alaa hana.alaa@libya.com	hana.alaa@libya.com	
☐	Lamin Jallow lamin.jallow@gmail.com	lamin.jallow@gmail.com	
☐	Isatu Jarjue isatu.jarjue@gmail.com	isatu.jarjue@gmail.com	
☐	Felix Mbuyi felix.mbuyi@gmail.com	felix.mbuyi@gmail.com

☐	Miatah Abena miatah.abena@gmail.com	miatah.abena@gmail.com	
☐	Daniel Habtemariam danielhabtemariam@gmail.com	danielhabtemariam@gmail.com	

This step selects which trainees will receive the assignment. Users can manually pick or auto-populate based on a challenge document.

1. (Optional) Enable **Select Trainee from Challenge Document** to auto-fill
2. Browse or search for trainees
3. Select trainees:
 - Individually using checkboxes
 - Or use **Select All** for bulk
4. Verify selected trainees
5. Click **Next**

Submission Table

#	DBID	Name	Status	Mark	Remark
1	69	HA Hana Alaa hana.alazahr@gmail.com	On Time	100 / 100	Returned
2	66	JB JeanClaude Bahemuka jean-claude.bahemuka@gmail.com	On Time	88 / 100	Returned
3	11	JA Joseph Andriamifidisoa joseph.andriamifidisoa@gmail.com	On Time	88 / 100	Returned

A comprehensive view of a specific assignment — submission status, grading progress, and performance analytics. Reviewers monitor trainee performance and manage grading here.

Key user actions:

- 1. View overall **grading and submission stats**
- 2. Analyze performance via the **grade distribution chart**
- 3. Review individual submissions in the table

4. Assign or update marks
5. Track submission status (**On Time**, **Late**, **Missing**)
6. Export data using **CSV export**

3.2.8.6 Assignment Grading — Submission Detail

The screenshot shows the 'Submission Detail' page for a trainee named Hana Alaa. The page is divided into several sections with annotations:

- Assignment Header:** Displays the assignment being graded: 'Strategic Product Development and Execution Final Submission - Report'.
- Trainee and Grade Status:** Shows the trainee's name 'Hana Alaa' and the status 'Returned 100 / 100'.
- AI Assistant:** A section for 'AI-generated insights or grading assistance'.
- Submitted Document:** Displays the submitted document/file, titled 'Strategic Product Development and Execution'.
- Overall Assessment:** Shows an 'Excellent' rating with a summary of the work.
- Rubric:** Displays evaluation categories and points awarded per criterion. The rubric includes categories like 'Depth and Ac...', 'Clarity and F...', 'Structure and...', and 'Innovation an...'. Each category has a score of 5 / 5.
- Files:** A section for 'Files' with a 'Report' button and a 'File history' link.
- Mark Grade history:** A section for 'Mark Grade history' showing a score of 100 / 100.

Annotations include:

- 'Displays the assignment being graded.'
- 'Shows trainee and grade status'
- 'AI-generated insights or grading assistance.'
- 'Displays the submitted document/file.'
- 'AI or reviewer-generated summary rating.'
- 'Track changes in grading.'
- 'Displays evaluation categories. and Points awarded per criterion'

The interface is branded with 'Nexara Dynamics' and 'Week 11 & 12 Challenge Document'.

This screen is used by reviewers to evaluate an individual trainee's submission. It combines document viewing, AI-assisted feedback, rubric-based grading, and final scoring in one interface.

Reviewer workflow:

1. Open trainee submission
2. Review document in **Submission Viewer**
3. Check **AI Assistant feedback** (*optional*)
4. Evaluate using **rubric criteria**
5. Assign or adjust marks
6. Review the overall assessment summary
7. Finalize grading (status becomes **Returned**)
8. Navigate to the next trainee using arrows

3.2.8.7 Grade History — Audit & Version Control

The Grade History modal provides a transparent audit trail of all grading actions performed on a submission.

Key actions:

1. Open Grade History from the grading screen
2. Review past grading records:
 - Who graded
 - When grading occurred
 - What score was given
3. (Optional) Click **Make Current** to revert to a previous grading state
4. Close the modal when done

3.2.8.8 Regrade Assignment — Re-evaluation Workflow

The Regrade Assignment modal allows a reviewer to request or perform a re-evaluation of a previously graded submission.

1. Open the submission grading screen
2. Click **Regrade**
3. (Optional) Enter **Tutor Feedback** explaining:
 - Why regrading is needed
 - What should be improved or re-evaluated
4. Click **Regrade** to initiate re-evaluation
5. The system updates grading:
 - A new evaluation is generated (AI/manual)
 - The previous grade is stored in Grade History

3.2.8.9 Feedback & Evaluation Panel (Grading Screen)

The screenshot displays the 'Week 11 & 12 Challenge Document' interface. On the left is a sidebar with navigation links: Home, Content, Leaderboard, Grade, and Trainee. The main content area shows a document titled 'Week 11 & 12 Challenge Document' with a page indicator 'Page 1 / 18'. To the right, there are two main sections: 'Evaluation categories' and 'Feedback'.

Evaluation categories: This section lists five criteria, each with a progress bar and a score of 5/5:

- Clarity and F...
- Structure and...
- Innovation an...
- Quality of An...

Feedback: This section provides a detailed view of the feedback for a specific criterion. It includes a list of criteria with expandable details:

- > Depth and Accuracy of Market Research
- > Clarity and Feasibility of Product Definition
- > Structure and Clarity of the Report
- > Innovation and Creativity in Product Concept
- > Quality of Analysis and Decision-Making

Below the feedback section is a 'Private Comments' area with a text input field and a 'Post' button.

Annotations:

- 'Displays evaluation categories' points to the list of criteria.
- 'Each rubric criterion expands into detailed feedback.' points to the 'Feedback' section.

This panel is part of the grading interface where reviewers evaluate submissions using predefined rubrics and provide qualitative feedback. It combines:

- **Rubric scoring** (quantitative)
- **Detailed feedback** (qualitative)
- **Private reviewer comments**

3.2.8.17 Leaderboard Dashboard

The screenshot displays the 'Leaderboard Dashboard' interface. On the left is a sidebar with navigation links: Home, Content, Leaderboard, Grade, and Trainee. The main content area shows a 'Leaderboard' section with a 'Rank Distribution' chart and a 'Score Distribution' chart.

Rank Distribution: This chart shows the distribution of trainees across performance levels. It indicates 5 Total Trainees with the following distribution:

- Excellent: 3
- Good: 2
- Poor: 0

Score Distribution: This chart is a visual histogram of score ranges. It shows the following distribution:

- 0-20: 0
- 21-40: 0
- 41-60: 1
- 61-80: 2
- 81-100: 2

Leaderboard Table: This table lists the top performers, including their rank, name, current score, and cumulative score.

#	Name	Rank	Current Score	Cumulative Score
1	Fatima Ali	Excellent	80	0
2	Hana Alaa	Excellent	87	0
3	JeanClaude Bahemuka	Excellent	100	0
4	Joseph Andriamfidisoa	Good	60	0
5	Vanessa O'Connor	Good	70	0

Annotations:

- 'Displays how trainees are distributed across performance levels.' points to the 'Rank Distribution' chart.
- 'Visual histogram of score ranges.' points to the 'Score Distribution' chart.
- 'Download leaderboard data' points to the 'Export to CSV' button.
- 'Filters leaderboard by topic' points to the 'AI for HR' dropdown menu.
- 'Leaderboard Table' points to the table listing trainee performance.

The Leaderboard provides a performance overview of trainees — ranking categories, score distribution, and individual trainee performance. It helps admins quickly assess learning outcomes and top performers.

Behavior:

- **Dynamic Updates** — Updates when new grades are submitted or assignments change
- **Filtering** — Leaderboard changes based on selected assignment and filters
- **Export** — Exports filtered dataset and ranking + scores

User workflow:

1. Admin selects assignment
2. Views rank distribution and score distribution
3. Reviews individual trainee ranking
4. Optionally exports data

3.2.9 Trainee Management

The Trainee Module is used to manage participants within a batch — admins/instructors can add trainees manually, import in bulk, and view/manage trainee records.

Add Trainee (Manual Entry)

The **Add Trainees Using Form** page lets staff enter a single trainee at a time.

1. Navigate to **Trainee** → **+ Add** → **Add Trainee Form**
2. *(Optional)* Toggle **IsMock** to mark this entry as a test/mock trainee
3. Fill in the required and optional fields:

Field	Required	Notes
First Name		Trainee's first name
Last Name		Trainee's last name
Email		Registered email used for login
Birthdate	—	Date picker
Nationality	—	Searchable dropdown
City of Residence	—	Free text
Gender	—	Dropdown
Vulnerability	—	Dropdown
Batch	—	Pre-filled from the batch context (e.g., <i>Batch 2</i>)
Group	—	Optional group assignment within the batch
Bio	—	Short biography (max 200 characters)

4. *(Optional)* Add **Custom Fields** by clicking **+ Add** at the bottom
5. Click **Save** (top right) to create the trainee, or **Cancel** to discard

4. Assign:
 - **Batch**
 - **Group**
5. Click **Save**
6. The system:

- Validates data
- Imports trainees
- Assigns them to the batch/group

CSV Format (Expected Structure)

Typical CSV fields:

first_name, last_name, email, birthdate, nationality, city, gender
John, Doe, john@example.com, 1995-06-12, USA, New York, Male
Jane, Smith, jane@example.com, 1997-03-22, UK, London, Female

CSV Preview & Validation (Before Import)

This screen appears after clicking **Preview** during CSV upload. It allows users to inspect, validate, and verify trainee data before final import. This step is critical to:

- Prevent bad data entry
- Catch formatting errors
- Ensure data consistency

Workflow:

1. User uploads CSV
2. Clicks **Preview**
3. The system parses the file and displays rows in a table
4. User verifies structure and data accuracy
5. User either:
 - Proceeds → **Save (Import)**
 - Cancels → fix CSV and re-upload

Add new trainees manually or via CSV

Trainee Table

This screen displays all successfully added trainees after manual entry or CSV import. It is the central management table for trainees.

Workflow after adding trainees:

1. Trainees are created (manual or CSV)
2. They appear in this list
3. The system automatically:
 - Assigns the batch
 - Sets default status = **Accepted**
 - Sets Leap Access = **Disabled**
4. Admin can:
 - Enable access
 - Edit trainee info
 - Filter / search trainees

Export Trainees — Column Selection

This modal appears when the user clicks **Export to CSV** on the Trainees list page. It allows users to customize which columns will be included in the exported file.

Selection logic:

- Select all columns, or deselect specific fields
- At least one column must remain selected (recommended validation)

Export output:

- Format: **CSV**
- Includes only selected columns and the current filtered dataset (if filters applied)
- **Does not** include hidden/internal fields or UI-only elements (avatars, icons)

User workflow:

1. User clicks **Export to CSV**
2. Modal opens
3. User selects desired columns
4. Clicks **Export**
5. CSV file downloads
